**Strong Customer Authentication** - Support for Strong Customer Authentication methods provided by banks to their clients.

**Security & Fraud Management** - Fraud monitoring services; Protection of backend systems

## 4. What is PSD2?

Payment Services Directive (PSD2) intends to promote innovation and a level playing field that enables new players and existing services to develop new ways of paying and accessing payment accounts.

Its **main goals are to:**

- Contribute to a more integrated and efficient European

payments market

- Improve the level playing field for payment service providers
- Make payments safer and more secure
- Protect consumers from unsupervised and unregulated access to their accounts
